

Rangkuman Default Styles (CSS Resets)

Browsers apply a set of default styles to every webpage. Such as larger and bolder headings on 'h1' elements, and blue, underlined links on 'a' elements.

A. CSS Resets

To remove or change default browser styles, ensuring consistency across different browsers. While CSS resets are still commonly used, they are not mandatory. Some developers opt not to use them. Resets provide a clean slate for custom styles. Developers can use prebuilt resets, create their own, or opt not to use them at all.

Contoh: Normalize.css, Reboot(dalam bootstrap 4), Modern CSS Reset(Josh Comeau), Eric Meyer CSS Reset.
